

Gregory T. Lyman

*Environmental Programs Director
Golf Course Superintendents Association of America*

Greg Lyman has served as the Environmental Programs Director for the Golf Course Superintendents Association of America since 2003. He works to develop programs and services that will assist golf course superintendents advance the compatibility of their golf facilities with the environment. He also works with golf industry stakeholders, environmental groups, scientists and environmental groups as an advocate of positive environmental progress for the golf industry. A major effort that began in 2004, the Golf Course Environmental Profile Project has been collecting information on golf course maintenance practices, inputs, stewardship efforts and natural resource conservation on golf properties on a national basis. This project will provide reliable information that will help guide future environmental efforts of the golf industry.

Prior to joining the GCSAA, he was the Turfgrass Environmental Education Specialist at Michigan State University. He has a Bachelor of Science degree from Michigan State University and Master of Science in Horticulture from Penn State University.
